Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 18-32, 34-43, and 45-52 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 18-32, 35-41, 43, and 45-52 directly or indirectly depend from cancelled claims 1-16.

Claim 34 recites the limitation "the volume of ablated corneal tissue" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 42 recites the limitation "ablating the volume of corneal tissue" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3735

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 44 is rejected under 35 U.S.C. 102(b) as being anticipated by Lai U.S.

Patent No. 5,984,916.

Lai discloses an ophthalmic laser apparatus and method of use for treating visual defects including myopia, the laser apparatus comprising a beam intensity controller 112 that is coupled to a computer control unit 114, which is suitably programmed to vary the intensity of the output surgical laser beam S as required for a particular surgical procedure. In this Office Action (OA), the programmable control unit 114 is treated as being equivalent to the recited "medium having stored therein an executable instruction." Moreover, the programmable control unit of Lai is capable to provide the recited function.

3. Claims 33 and 44 are rejected under 35 U.S.C. 102(e) as being anticipated by Williams U.S. Patent No. 6,413,251.

Williams discloses a laser eye surgery system and a LASIK method for correcting refractive disorders of the eye such as myopia, the method comprising the step of ablating a volume of corneal tissue outside an optical zone of nominal ablation region of the cornea as presently claimed (see Fig. 13 and col. 8, lines 49-67).

Art Unit: 3735

4. Claim 17 is rejected under 35 U.S.C. 102(e) as being anticipated by Cox et al. U.S. Pat. No. 6,926,710.

The applied reference has a common a common assignee and at least one inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ahmed M. Farah whose telephone number is (571) 272-4765. The examiner can normally be reached on Mon-Thur 9:30 AM-7:30 PM, and 9:30 AM - 6:30 PM. The applicant is invited to contact the Examiner to expedite the prosecution of this application if the applicant is of the opinion that an interview, personal or telephonic, or discussion of the outstanding issues will place the application in condition for allowance.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marmor II Charles can be reached on (571) 272-4730. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
